Welding Gloves

Welding Safety and Health

Miller gloves are designed to endure daily abuse prevalent within welding environments. Carefully selected materials and craftsmanship result in a glove that welders will want to wear, reducing the risk of hand lacerations and boosting productivity.

Performance Series

Unprecedented comfort and performance, redefining the welding glove industry.

- Three-dimensional pattern provides an excellent fit, resulting in unmatched comfort
- Premium-grade leather heightens dexterity and extends wear
- Precision craftsmanship with unique design for welding applications enhances productivity and compliance

Classic Series

Classic. Comfortable. Cost-effective.

- Traditional glove design taken to the next level, amplifying fit and comfort, at a cost-effective price
- Materials selected to provide required dexterity and wear

Performance Welding Gloves

Extra Heavy-Duty MIG/Stick
- An industry first! Silicone patches on back for heat and spatter protection
- Multi-layered insulated palm and back
- Dual-padded, pig grain palm for added comfort

Heavy-Duty MIG/Stick (21-inch Long Cuff)
- Padded forearm for additional protection and comfort
- Triple-layered insulated back
- Strategically placed patches on pig grain palm and cow split back for extended glove life

Heavy-Duty MIG/Stick
- Strategically placed patches on palm and back for extended glove life
- Double-layered insulated palm and back
- Pig grain leather palm provides extreme durability and protection

MIG/Stick
- Dual-padded palm for added comfort
- Wool back provides ultimate insulation
- Cow split leather provides extreme durability and protection

MIG (Lined)
- Dual-padded palm
- Fleece insulated palm, foam insulated back
- Cow grain palm, pig split back and goat grain inner fingers provide exceptional dexterity and comfort

MIG (Unlined)
- Unlined palm for heightened feel and dexterity
- Double-layer insulated back and dual-padded palm for added comfort
- Cow grain palm, cow split back and goat grain inner fingers provide exceptional dexterity and comfort

TIG
- Completely unlined for heightened feel and dexterity
- Triple-padded palm for added comfort
- Goat grain leather offers superior flexibility and dexterity

TIG/Multitask
- Dual-padded palm for added comfort
- Wool back provides ultimate insulation
- Goat grain leather offers superior flexibility and dexterity

Work
- Dual-padded palm for added durability
- Fleece back provides ultimate insulation
- Cow grain leather offers superior durability and abrasion resistance

Metalworker
- Durable top grain leather and spandex back for enhanced durability and dexterity
- Neoprene wrist with hook-and-loop closure increases fit and support
- Padded, reinforced palm and thumb saddle for extended wear

Classic Welding Gloves

Heavy-Duty MIG/Stick
- Reflective insulation on back reduces heat impact
- Moisture-wicking fleece and foam insulation
- Pig grain palm, pig split back and cuff

MIG (Pigskin)
- Reinforcement patches enhance durability
- Moisture-wicking fleece and foam insulation
- Pig split leather palm, back and cuff

MIG (Cowhide)
- Reinforcement patches enhance durability
- Moisture-wicking fleece and foam insulation
- Cow split palm, pig split back and cuff

TIG
- Thin internal padding for added comfort
- Unlined palm for precise dexterity
- Sheep grain palm, cow split back, pig split cuff

Glove 101

How to Get the Proper Fit

Size	Inch
XS	6–7
S	7–8
M	8–9
L	9–10
XL	10–11
XXL	11–12

- Select gloves made of materials that will perform best according to the specific application.
- Make sure the glove fits for added safety, comfort and dexterity. A glove that is too big or small can decrease performance and increase the risk of injury.
- Engage workers in the selection process — they'll be more likely to wear them if they choose them.
- Conduct regular inspections to make sure the gloves are in good condition before wearing. Replace any gloves that are worn or torn.

Glove Features

Component	Thread	Lining			
Material	Kevlar®	Wool	Cotton/Foam	Cotton	Aluminized
Feature	• High heat resistance, does not melt • 2.5 times stronger than nylon or polyester thread • Has little to no stretch for a tight seam	• Best heat protection • Thicker, with somewhat limited dexterity • Designed for higher heat and cold weather applications • Wicks moisture	• Good for medium-to-heavy stick welding applications • Cotton absorbs moisture • Foam protects against heat	• Maximum dexterity • Maximum moisture absorption	• Reflects radiant heat for high heat handling

Component	Exterior					
Material	Cowhide	Deerskin	Pigskin	Goatskin	Sheepskin	Silicone
Feature	• Most versatile • Various grades and grains available, which affects pliability and strength • Ideal for stick and MIG welding and handling	• Extremely soft • Snug fit provides maximum dexterity • Ideal for TIG welding and lighter-duty handling	• Soft and durable • Naturally resistant to moisture • Extremely breathable • Ideal for stick and MIG welding and handling	• Greatest tensile strength for weight • Resistant to scraping and rubbing • Ideal for TIG and MIG welding and handling	• High dexterity rating • Smooth surface for wire handling • Ideal for TIG welding	• Strong and durable • Resists temperature extremes, oxidation and ultraviolet radiation • Withstands up to 660°F • Repels moisture
